PROFESSIONAL SUMMARY

Cybersecurity graduate (BTech, CSE–Cybersecurity) transitioning from an engineering background into security operations, backed by hands-on SIEM, threat-detection, and incident-response projects. Built and operated a Wazuh/Splunk home SOC lab, ranked in the top 9% globally on TryHackMe, and completed cybersecurity internships in network security assessment and Python automation. Seeking an SOC Analyst (L1) role to apply skills in log analysis, alert triage, MITRE ATT&CK-based detection, and incident investigation.

EDUCATION

Institute of Aeronautical Engineering

Dundigal, India

BTech in Computer Science and Engineering (Cybersecurity) | Nov 2023 – Apr 2026 | GPA: 8.12/10.0

J N Government Polytechnic

Hyderabad, India

Diploma in Civil Engineering | Jun 2020 – Apr 2023 | GPA: 8.73/10.0

T S Model School

Jangaon, India

SSC | Jun 2014 – Apr 2020 | GPA: 10.0/10.0

PROJECTS

AI-Powered SOC Assistant

[GitHub →](#)

Python, Splunk Enterprise, Streamlit, Ollama/OpenAI API, Pandas, Plotly, MITRE ATT&CK, ReportLab

- Built an AI-assisted SOC investigation platform integrating Splunk Enterprise SIEM with Python, mapping Windows Security Events (4625, 4672, 4688, 5379, 4798) to MITRE ATT&CK techniques (e.g., T1110 Brute Force, T1059 Scripting Interpreter, T1543.003 Windows Service).
- Developed a natural-language-to-SPL query generator, multi-event correlation engine, and risk-based alert scoring, plus an IOC extraction module for IPs, domains, URLs, and MD5/SHA256 hashes with threat-intel enrichment via VirusTotal, AbuseIPDB, AlienVault OTX, and Shodan.
- Built a Streamlit dashboard for real-time alert/severity visualization and an automated PDF incident-report generator covering timeline, evidence, affected hosts, IOCs, and containment recommendations.

PhishCatcher – AI-Driven Client-Side Defense Against Phishing & Web Spoofing

[GitHub →](#)

Python, Flask, Scikit-learn, SQLite, Random Forest, SVM, XGBoost, Stacking Classifier

- Trained and compared 4 classifiers (SVM, Random Forest, XGBoost, Stacking Classifier) on a balanced set of 10,000 URLs (5,000 phishing, 5,000 legitimate); best-performing model (Random Forest) achieved 85.0% test accuracy, an 83.1% F1-score, and 95.3% specificity.
- Engineered URL-based detection features (URL length, HTTPS usage, WHOIS data, suspicious keywords, HTML form structure) used to train and evaluate all four models.
- Built and deployed a Flask + SQLite web application with secure user authentication for real-time URL classification, flagging phishing sites before user interaction.

EXPERIENCE

Cybersecurity Intern — Redynox

Jun 2025 – Jul 2025 | Virtual

- Conducted network security assessments and vulnerability analysis across 2 simulated environments, identifying and prioritizing findings by risk using industry-standard scanning and analysis tools.
- Performed wireless security testing (WPA2/WPA3) and web application security testing, documenting findings and remediation recommendations for each assessment.
- Carried out packet-level network monitoring and traffic analysis to identify anomalous behavior and potential indicators of compromise (IOCs).

Python Developer Intern — Vilindha Technologies

Mar 2024 – Apr 2024 | Hyderabad

- Wrote Python automation scripts to streamline backend and data-handling tasks.
- Supported debugging and testing of a scalable application, contributing to 20 bug fixes.

SKILLS

Security Operations: SIEM Monitoring, Log Analysis, Alert Triage, Event Correlation, Incident Response, Vulnerability Assessment, IOC Analysis

Tools & Platforms: Splunk, Wazuh, ELK Stack, Wireshark

Frameworks: MITRE ATT&CK (technique mapping & detection engineering)

Programming & Data: Python, SQL

Cloud / Zero Trust: Zscaler Zero Trust (ZTCA)

CERTIFICATIONS

- Cyber Job Simulation — Deloitte Australia (Forage) | Jul 2026
- Zero Trust Certified Associate (ZTCA) — Zscaler | May 2025
- Zero Trust Cloud Security — Zscaler | Mar 2024

ACHIEVEMENTS

- Ranked in the Top 9% globally on TryHackMe, completing hands-on labs across SOC operations, Blue Team defense, Windows/Linux forensics, networking, and incident response.
